Shared physical model (all four stages):
DEM cruise altitude | nonlinear range | two-stage charging
Problem 1: DEM-ELBPP
energy-aware bin packing
batches
Problem 2: HF-VRPBT
heterogeneous-fleet routing
with time windows
transport schedule
Problem 3: MHPRS
multi-hover-point relay scheduling
(fixed transport plan)
transport + relay plan
Problem 4: SC-MAE-RG
clustering / resource accounting
/ gap analysis
